

Python Pi Challenge

Conveyor Belt

The Pi Challenges

No code provided for you this time! Can you figure out how to write it yourself?

Have you ever been at an airport and stood on one of those long moving walkways? Why not have a go at building one in Minecraft?

Hints

Build a road a few blocks wide of, say, stone. Now write your program to detect if you are standing on stone, and automatically add 1 to the player position every second or so. How will you make sure you add the block in the right direction?
